## Training System

KONGSBERG

### Control Grip Function

- 1- Laser Range Finder Button (LRF)
- 2- Charge Button (CHG)
- 3- Track Button (TRACK)
- 4- STAB On/Off
- 5- Trigger Button (TRIGGER)
- 6- Focus Button (FOCUS)
- 7- Palm Switch
- 8- Day and Night Button (DAY/NT)
- 9- Lead Angle Button (LEAD)
- 10- Null Button (NULL)
- 11- Magnification Button (MAG)

## Computer Based Training

– Train whenever you need, wherever you are

PROTECTOR Remote Weapon Station (RWS) training is often exposed to a variety of different challenges: high personnel turn over, large target groups, short available training periods, geographical location, multiple configurations of the live system and different languages.

Computer Based Training (CBT) eases the training challenges for the operators and maintenance personnel of the PROTECTOR RWS.

It is impossible to qualify operators or maintenance personnel with only the use of Computer Based Training. However, it is possible to provide the necessary training CBT to go hands-on to the live system with supervision of qualified instructors. The purpose of the CBT is to reduce the need for traditional classroom training and shorten the training period.

The training solution for the PROTECTOR RWS covers all three learning stages: Level 1 (Knowledge) is covered by Computer Based Training and are common for both target groups.

Level 2 (Skills) are covered by the Gunner Skill Trainer for the Gunners and CBT for the maintenance personnel.

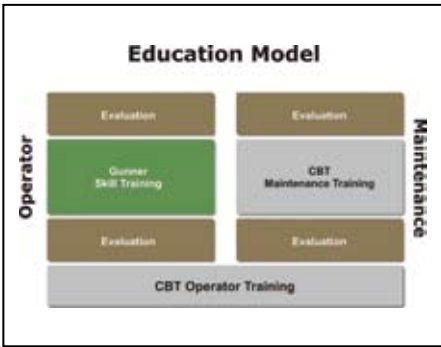

Level 3 (Practice) is covered by hands on training. This can be conducted by trainers from KONGSBERG at ours or the customers' premises.

### FEATURES

- Highly interactive
- State of the art training system
- Stand alone and classroom capability
- Fully SCORM compatible
- All in one box

**WORLD CLASS** – through people, technology and dedication

### Educational model

The trainee starts with basic operator training and must pass that qualification, and each subsequent stage, before moving on. For example, if your objective is to qualify as a Gunner, you move on to the Gunner Skill Trainer for extensive training in that aptitude. Maintenance personnel would move forward to the Basic Maintenance Training.

### Basic Operator Training

The goal of the Basic Operator Training is to train all target groups of the PROTECTOR RWS in basic knowledge and skills of correct operation of the system. This module can be described as an interactive and pedagogical walk through the Operators manual.

### Basic Maintenance Training

The Basic Maintenance Training gives the trainees a much deeper knowledge of the system's features and functionality. This is crucial to perform correct trouble shooting and fault finding on the PROTECTOR RWS. The training also includes a high degree of interaction with the documentation and the Interactive Maintenance Library to provide the necessary skills for corrective maintenance.

## PROTECTOR Remote Weapon Station

PROTECTOR Family with more than 3500 systems in active service world wide;

- M151 PROTECTOR
- PROTECTOR CROWS
- PROTECTOR Lite
- Sea PROTECTOR
- PROTECTOR Training Systems

PROTECTOR - chosen by 16 nations
