

Support Plate

PRODUCT NAME:	Support Plate
CATEGORY:	EPC
FIELD/CLIENT:	
NORNE	2005 Statoil 1 off
DESCRIPTION:	The steel plate provide a stable footing and a predictable feed-back to the inline tee structure. The tee was thus able to withstand the overturning moment from the pipeline without the danger of one side support digging into the seabed.
HAVTROLL SCOPE:	Concept development, detail engineering, procurement and fabrication of Support Plate. Design with regards to structural strength analysis, lifting analysis, corrosion and installation method.
