

VESSEL INSIGHT ACCESS

COACH
SOLUTIONS

KONGSBERG

This is Vessel Insight

Vessel Insight provides vessel-to-cloud data infrastructure capturing and aggregating quality data in a cost effective and secure way. The solution is delivered as a service, eliminating the need for large up-front investments and costly upgrades. Vessel Insight provides instant and easy access to fleet overview, vessel specific dashboards, data analysis tools, applications from various providers, as well as a powerful API.

UTILIZE THE POWER OF YOUR DATA

Faster, easier, and more
reliable digitalization

With the new Vessel Insight Access, Kongsberg Digital is making it easier for vessels and vessel owners to embrace digitalization and enjoy the benefits of applications without the need of additional hardware onboard. This setup is especially beneficial if it is challenging to get all required sensor data for your desired end goals.

Why choose Vessel Insight Access for noon reporting?

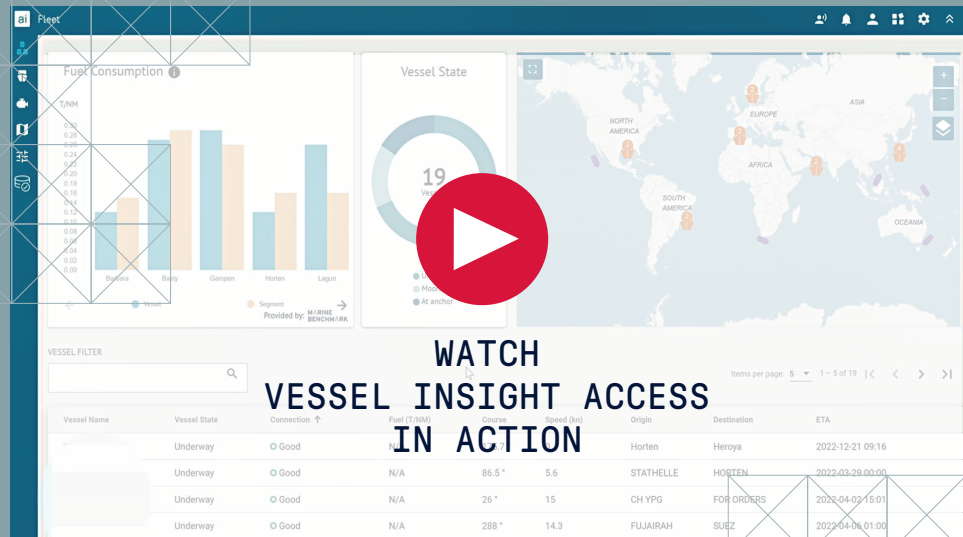

- **Start reporting same day** - Quick and simple installation only requiring software
- **Intuitive and user-friendly** interface
- **Flexible** - Possibility of user defined report fields, validations and warnings
- **Integrated** - All reported data is automatically mapped and structured in Vessel Insight cloud
- **Data quality** - Up to 100 data quality checks before delivering data to you

for a quick introduction to the ease of use and powerful functions in Vessel Insight Access.

WATCH VESSEL INSIGHT ACCESS IN ACTION

WHAT'S INCLUDED?

- Support to make sure all vessels are reporting.
- COACH Online access with live data and unlimited users.
- MRV, DCS and CII Rating. A collection of all related figures and generation of dataset – ready for submission.
- Unlimited Email Notifications to receive noon reports directly in our inbox as well as in the Vessel Insight cloud environment.
- Position overview with hourly sat-AIS for all vessels.

The manually entered data from the vessels will be made available in the Vessel Insight cloud for further value creation and could also be combined with live sensor data if your vessels are equipped with Vessel Insight Hardware. By combining vessel specific reported data with live sensor data, we can get your applications up and running now!

Ensure data quality in your Noon Reports

Kongsberg Digital offer high quality reports through our COACH Onboard platform, which can be easily installed on a computer onboard all your vessels. The noon reporting program collects, validates and transfers data from ship to shore. Due to more than 100 validations checking the data and prompting corrections or comments before the data is transferred to shore, it is a market leading solution. The validation parameters are vessel-specific and adjusted according to your requirements.

Save time onboard and onshore

Vessel Insight Access is especially suited for crew reporting with digital entry. Data from reports are structured and contextualized in the cloud for further utilization in applications, analysis, and other value adding measures.

Emissions monitoring and reporting

Emissions monitoring of the most important performance indicators is key in today's market. Vessels need every proof available of reliability and efficiency. Vessel Insight Access enables you to easily pull MRV/DCS and CII dataset – ready for reporting.

Our Noon report solution is installed on over 900 merchant vessels worldwide.
