

TOWCON X7

KONGSBERG

DECK MACHINERY & MOTION CONTROL

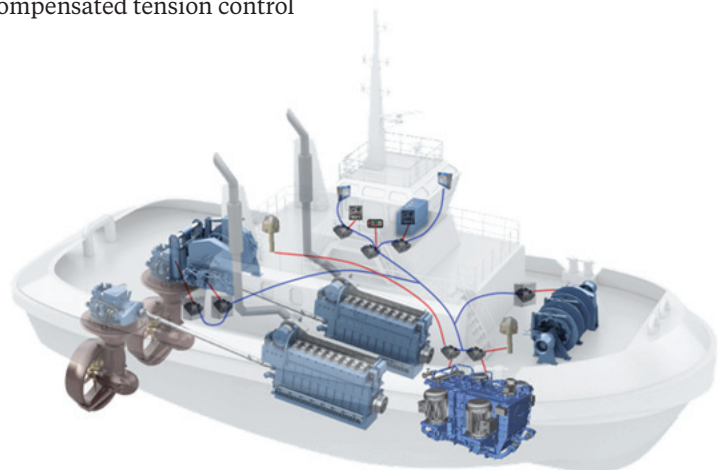

Winch control system for tug

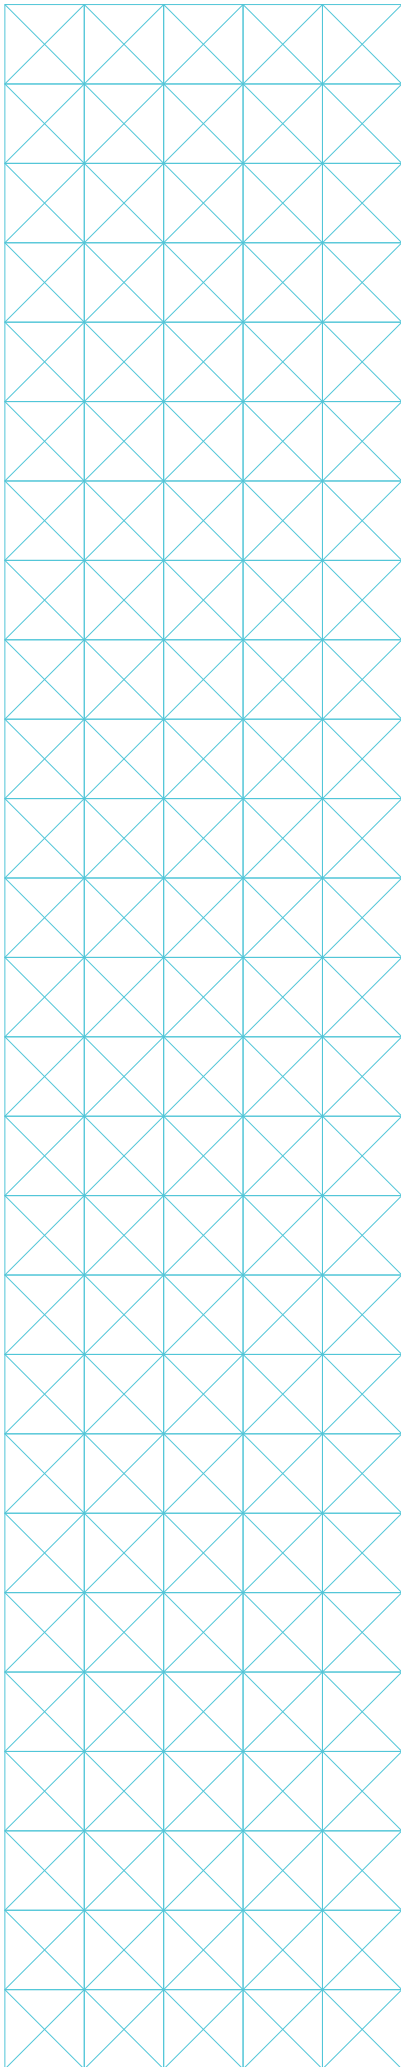

The Towcon X7 is a KONGSBERG winch control system. Fully based on Kongsberg Maritime common controls platform technology and prepared for Remote Service.

Upgrading the winch control system will ensure continued safe and uninterrupted operation of your equipment. An upgrade will also improve safety for the crew and improve efficiency.

Operational modes

- Manual operation
- Rendering mode
- Rendering/Recovery mode
- Layer compensated tension control

Main control lever

- Designed for towing vessels
- One handle to control multiple winches
- Operation of spooling gears
