

NET SOUNDER SYSTEM

KONGSBERG MARITIME DECK MACHINERY

Net Sounder System

DESCRIPTION

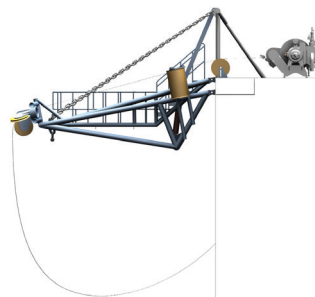

- Reduces the risk of damaging the sounder cables when sailing in ice covered seas.
- Lower the wire line when sailing along the coast where birds (and especially protected species) are present.
- No height steps: wire height can be adjusted to any value between the highest and lowest position.
- Self-rotating wire sheaves to adapt wire lines and ship's movements.
- Up to two sounder winches can be used at the same time.
- Easily adapted to different sounder cables diameters.
- Designed for easy maintenance.
- Retro fit possible on most ships designs.
