

## WHO WE ARE

Zegeba provides a generic software platform used by businesses, organizations and partners who have great ideas and ambitions within digitalization and optimization of core business processes. We care about people! That is why we develop tools for those who perform work processes where information, observation and experience from humans are needed to provide accurate documentation and real time data for further processing and completion.

Team Zegeba has a passion for problem solving. In collaboration with partners and businesses our aim is to be in the forefront of software development and create solutions that handle the transformation of business-critical human data into a format that communicates seamlessly with applications, machines and analytics.

## WHY ZEGEBA?

Spend less time on administrative tasks and coordination. Explore improved efficiency in your operations with the help of a specialized tool built for handling the data capture in a smart format that connects human work tasks and data to the other processes in the business.

### OPTIMIZE WORK PROCESSES

- ✓ Smart workspace for iOS, Android, web, mobile, tablet, desktop
- ✓ Configuration with drag-and-drop designer and template import
- ✓ Online and Offline mode with smart sync prevents interruptions
- ✓ Digital PDF report for work reports and basis for invoicing
- ✓ Audit info per checkpoint for quality assurance and compliance
- ✓ Photo, video, audio capture for accurate documentation
- ✓ Signature, time stamp and GPS to increase reliability
- ✓ Real time data optimized for instant analysis and reporting
- ✓ API to connect applications and enable seamless data flow

## ZEGEBA PLATFORM

### Zegeba Dashboard

The Zegeba Dashboard is the place to manage form templates, see and edit data and manage users and assign roles and permissions across the organization. Include partners and subcontractors in the same workspace for seamless collaboration. Procedures or instructions can be included in forms and checklists via Resources and they are available also when the user is offline.

### Zegeba App

The Zegeba Apps for iOS, Android and web browser makes sure the communication between the field workers and office workers is secure and stable. The smart sync service let users continue to work even when there is no network available. Zegeba App for forms and checklists, tasks and projects are used for seamless optimization of the work processes and can be connected to other business applications via the standard Zegeba API.

### Zegeba Designer

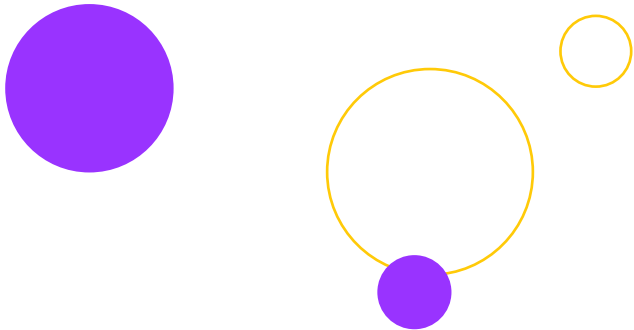

The Zegeba Designer is a tool for creation and modification of templates for forms and checklists. Admin users can easily create small as well as complex forms - without a single line of code. Use drag-and-drop to combine elements and let the instant preview show you how the form will look like on different devices. You may also import a Word document to create a form in minutes. Version management of both forms and data is an important part of the Zegeba Platform.

## SOLUTION

Zegeba is a fully digitalized solution created to streamline the work activities and management of documentation for work tasks. Zegeba Platform enables smart data handling strategy for increased performance and success in the mobile and digital workspace.

Field work has its own challenges, and it is important that the digital solution also works offline to avoid interruptions and delays of work tasks. Zegeba smart sync apps let workers continue the work even when they have poor or no network connection, keeping the data secure both in offline and online mode. All data syncs to the Zegeba online Dashboard for overview and control and can be viewed and further processed in a separate analytics application or other business applications via the Zegeba API.

## BENEFITS – QUICK WINS

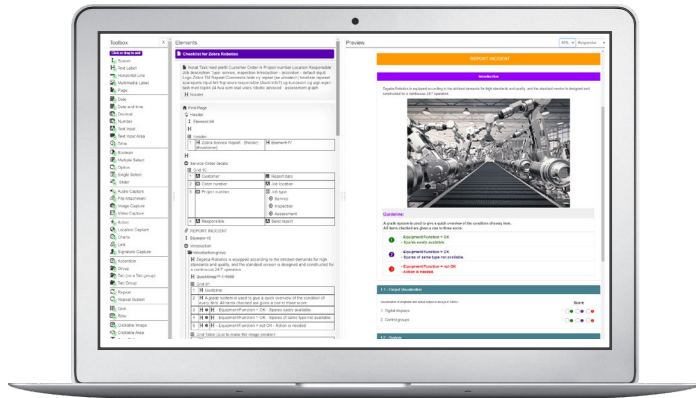

- SAVE TIME AND REDUCE COST
- IMPROVE QUALITY AND CONTROL
- STREAMLINE OPERATIONS
- AUTOMATE MANUAL STEPS
- MORE SUSTAINABLE BUSINESS
- GAIN COMPETITIVE ADVANTAGE

## USAGE

Collecting and utilizing information in a fully digital format, ready for operational processing, will empower businesses to improve in many ways. Digitized information is essential for the core business whether in the form of documentation of performed work or as basis for invoicing or other internal processes such as HSEQ and improvement work. Typical usage of Zegeba is:

- Forms & checklists
- Tasks
- Inspections
- Quality Assurance
- Service & Aftermarket
- HSEQ
- FAT / HAT / SAT
- Commissioning
- Assessments
- Project documentation
- Order to Task workflow via API

## PARTNER

Zegeba collaborates with various partners with the mutual objective of helping companies optimize their business processes with Zegeba – including linking to applications that the companies may already use in their daily operations.

Some of these partners are consultants with an expertise in digitization and change management, others are integration partners who specialize in selected applications and industries. Others are product companies that have included Zegeba's technology in their own solution - "Powered by Zegeba".
