TEMPERATURE SENSORS FOR ALARM, CONTROL AND MONITORING SYSTEMS.

We refer to your Email dated 28 October 2004.

Please be informed that according to our current Rules and Regulations for the Classification of Ships, Part 6 Chapter 1 Section 1.3.2 equipment used in control, alarm and safety systems is to be suitable for its intended purpose, and accordingly, whenever practicable, be selected from the "List of Type Approved Products" published by LR.

Accordingly temperature sensors for alarm, control and monitoring systems are recommended, but not required to be type approved by LR.

Yours faithfully

Odd Fredriksen
Surveyor to Lloyd's Register EMEA
