Subject: KD-30 Notification, Last Time Buy (LTB) and End of Life (EOL)

Dear valued customer,

The intent of this letter is to inform you of the Kongsberg Maritime decision to obsolete all support of the product KD-30, Alarm and Control System after October 1 2016.

KD-30 was introduced 1996 and delivered until 2001. After more than 20 years since the introduction, wherein the recent years with limited spares support, Kongsberg Maritime sees that available spare parts is close to be emptied.

Therefore it has been decided to issue an EOL notification for support of alarm- and control system KD-30. Customers that may want to place a last time buy order for spare parts components are requested to do so at latest August 1 2016.

Being aware of the difficult situation an obsolete system may cause, Kongsberg Maritime has developed replacement systems based on new technology. By using the knowledge from an obsolete system, we are able to transfer parameters and databases directly into a replacement system. The existing cabling might for the most part be reused.

We offer replacement systems for installation on relatively short notice at reasonable prices.

Options:

- Total retrofit of the whole system to K-Chief 600.

Please contact Customer Support for more information on either mail: km.support@kongsberg.com or phone: +47 33032407.

Yours faithfully
