# Transducer 15 - 17

15 kHz single beam transducer for ocean depth and subbottom details in shallow water

## Introduction

The 15 - 17 is a transducer with beam width 17°. The transducer has low Q and low frequency ceramic arrays for ocean depth measurement and accurate data.

It has 13 elements encapsulated in a cast Urethane housing. Adapted for use as a portable mount.

**KM order number:** KSV-223313

## Technical specifications

Resonant frequency ..... 15 kHz  
Circular beam width ..... 17 degrees

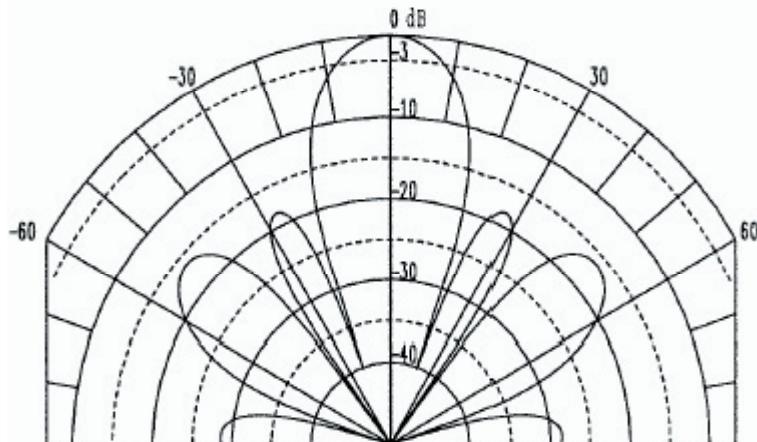

Directivity:

D ..... 100  
DI =  $10 \log D$  .....  $19.9 \pm 1$  dB

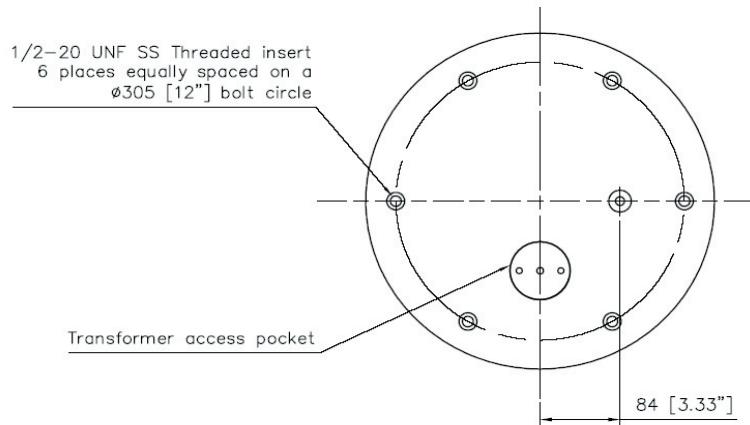

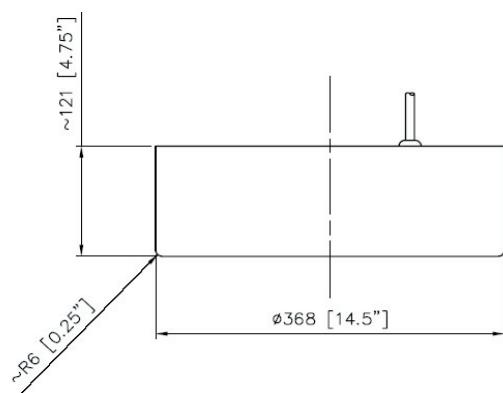

Equivalent two-way beam angle:

$\Psi$ .....	0.049
$10 \log \Psi$ .....	-13 ±1 dB
Side lobes .....	Less than 17 dB
Impedance nominal value .....	60 ohm
Transmitting Voltage Response .....	$165 \pm 2$ dB re 1 μPa per V
Receiving Voltage Response .....	$-169 \pm 2$ dB re 1 V per μPa
Electroacoustic efficiency .....	0.45
Maximum pulse power input .....	3.5 kW @ 2% duty
Maximum continuous power input .....	70 W
Cable length .....	15 m
Cable diameter .....	10 mm
Weight with/without cable .....	28 / 25 kg
Storage temperature .....	+48 to -6°C

## Beam pattern
