

PROCUREMENT AND COST CONTROL SYSTEM

A system for purchasing, order and supplier management.

Easy to use

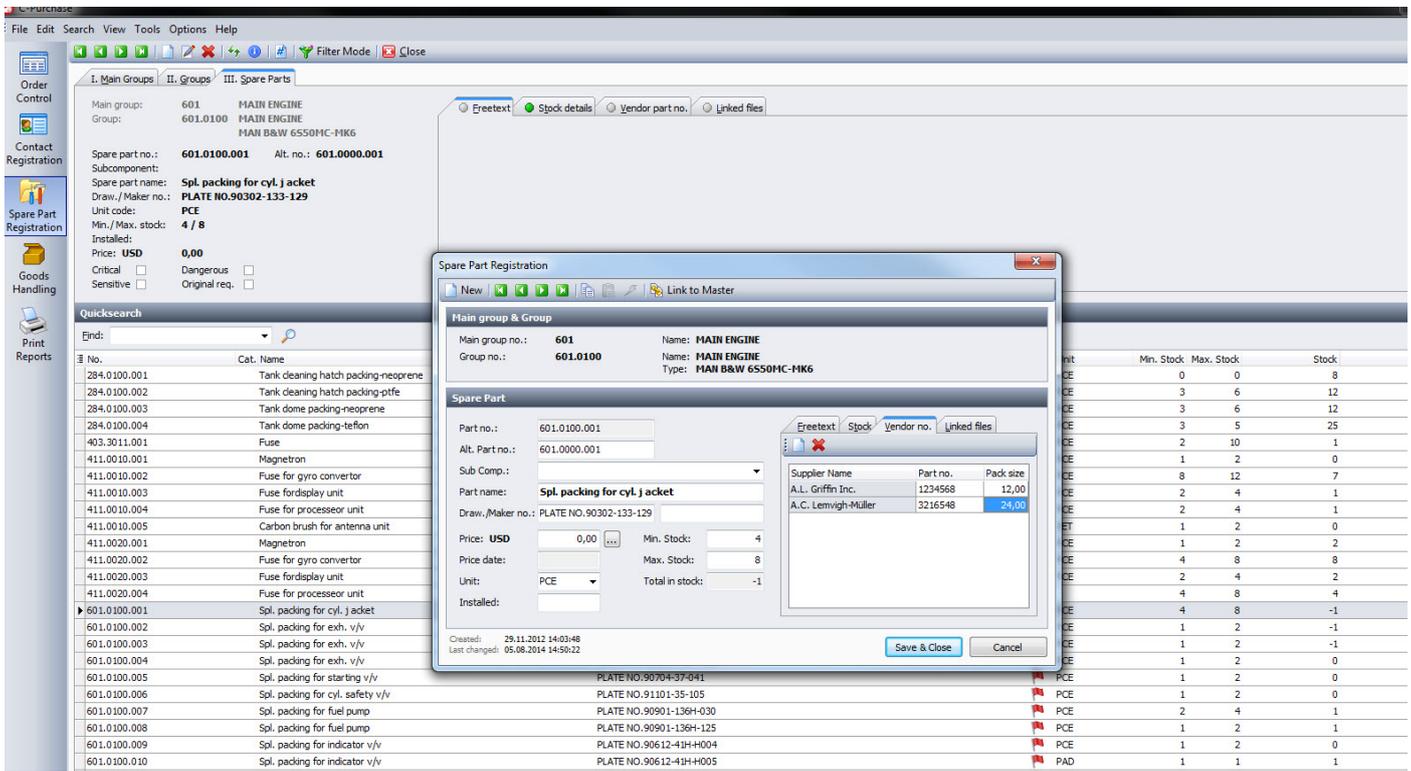

The Purchase purchasing system is a centralized purchasing tool for the entire fleet, designed to enable efficiency throughout the process from requisition through to delivery and cost control.

A two-way flow of data between Spares spare part inventory system installed onboard and the Purchase installed at the fleet main office support a transparent procurement and supply process. Purchase link to the onboard Spares, for reading requisitions and received items from the vessels and updating the vessels on order status. Integration with Budget program providing a complete overview and control of the budget and costs for each vessel in the fleet. This improves data quality and creates a good foundation for taking the right decisions at all levels in the organization.

Great flexibility

Purchase is part of the K-Fleet software system. The modular approach ensures that system solutions can be tailored to the requirements of each particular vessel type. A user friendly interface make it quick and easy to use for the operator.

Sales, installation, commissioning and service support is provided by KONGSBERG's worldwide network.
