Subject: Last Time Buy (LTB) of spares and End of Life Notification (EOL) – KM-2

Dear valued customer,

The intent of this letter is to inform you of the Kongsberg Maritime decision to obsolete all support of the product KM-2 after August 1 2016. KM-2 was introduced 1984 and delivered until 2003. After more than 30 years since the introduction Kongsberg Maritime has seen a significant decline in demand for spare parts.

Therefore it has been decided to issue an EOL notification for support of alarm system KM-2. Customers that may want to place a last time order for spare parts components are requested to do so at latest June 1 2016.

Being aware of the difficult situation an obsolete system may cause, Kongsberg Maritime has developed replacement systems based on new technology. By using the knowledge from an obsolete system, we are able to transfer parameters and databases directly into a replacement system. The existing cabling might for the most part be reused.

We offer replacement systems for installation on relatively short notice at reasonable prices

Options:

- Total retrofit of the whole system to K-Chief 600.

Please contact Customer Support for more information on either mail: km.support@kongsberg.com or phone: +47 33032407.

Yours faithfully
